

[Health Facilities Reports](#)

Whether you work at a healthcare facility or would like to learn about the survey (inspection) history of a health facility for yourself or a loved one, the Health Facilities Division keeps a public record of facility surveys. You will be able to review the nature of the survey, number of regulatory violations for the survey (if any), any licensure actions taken, as well as read copies of the reports filed after the visit.

To access health facility reports, visit the [Health Facilities Division online database](#) and select “Entity Search” on the right side of the page. From there, you will be able to search by health facility name, type, or location to find recent reports. **You can also export the list as a .csv or PDF file.**

Note that for the best user experience, DIA recommends using the application in Chrome, Edge, or Safari browsers.

The screenshot shows the top navigation bar with the Iowa Department of Inspections & Appeals logo and links for Home, Login, and Reports. The main content area is titled "Direct Care Worker Registry & Health Facility Database" and contains two search panels. The left panel, "DCW SEARCH", is for looking up eligibility status and includes fields for Identification Number, First Name, Last Name, City, and Counties. The right panel, "ENTITY SEARCH", is for looking up contact details and includes fields for Name, City, Counties, and Entity Types. Both panels have a "SEARCH" button, and the Entity Search panel also has a "CLEAR" button and an "Advanced Search" link.
